
BLOCKSOLVE®:
Enzyme Drain Blocks

Additional Information:

To reduce unpleasant odors and blockages and to break down grease and fat

To be used in grease/fat traps and open drains found in kitchens, hospitals, hotels, restaurants, catering companies and more

Blocksolve® is highly concentrated, long lasting, easy to use, economical, safe for all plumbing, reduces fog, degrades food residues, reduces odors, ends back-ups and no dosing unit is required

How to use Blocksolve®:

Skim off surface fats as necessary

Most grease traps are equipped with a basket in the centre

Remove the basket and clean it out

Place the Blocksolve® in the basket and return the basket to the grease trap

Every week, clean the basket removing papers, plastics and other inorganic matter

Follow the same procedure every month

Storage:

Blocksolve® must be stored in a cool dry place and it should not be wrapped or carried in plastic

Warnings:

Do not ingest

No special safety precautions required
